Refer to terms for SLA definition for **Bronze Support** (https://sixsq.com/terms/eula)

Discounts are calculated independently for NuvlaBoxes and App Deployments

(1) A NuvlaBox is a computer (normally a single board computer) running the NuvlaBox software.

(2) Running on your *own infrastructures* (e.g. Kubernetes and Docker Swarm clusters), typically running in the public or private cloud (a.k.a. not a NuvlaBox).
